

WHC Lab Ltd., Prospect Lower. Newcastle.

1. PRODUCT AND COMPANY DETAILS

Product

Name of Product: Pineapple Passion

Chemical Name: Saccharomyces cerevisiae

Chemical Family: Kingdom Fungi, species Saccharomyces cerevisiae Composition: Proteins, nitrogenous substances, sugars, organic acids, DNA, and fat. It has a

high concentration of living, functional microorganisms.

Details of the supplier of the safety data sheet Name of Company: WHC Lab Ltd. Address: WHC Lab, Prospect Lower, Newcastle, Co. Wicklow, Ireland, A63 H0K8

Material Safety Data Sheet Pineapple Passion Dehydrated Yeast

Emergency Contact Numbers Director - Tony O'Kane: +353 (0)87 948 3590

Quality & Sales - Philip Woodnutt: +353 (0)89 406 8622 Accounts - Judith Moss: +353 (0)86 896 1901

In case of an emergency please contact the local emergency services.

3. INGREDIENT COMPOSITION

2. HAZARDS

Classification This product is not classified as dangerous according to CLP Regulation (EC) no 1272/2008.

Due to cell metabolism, rehydrating Pineapple Passion Dehydrated Yeast may release CO2.

It may also release CO₂ if subjected to extremely high temperatures.

Components Cas Registry Number Concentration Classification (CLP) 68876-77-7 99% Not classified Saccharomyces cerevisiae Sorbitan monostearate 1338-41-6 1% Not classified (Emulsifier E491 - rehydration agent)

	4. FIRST AID PROCEDURES	
	Description of first aid procedures	
	Contact with Eyes:	If contact occurs, immediately rinse eyes thoroughly with water for a minimum of 15 minutes.
	Contact with Skin:	Use soap and water to wash. When exposed to yeast, some people may experience allergic reactions; in this instance, please contact a dermatologist or other medical provider.

Consuming too much yeast with a high concentration can Ingestion: result in digestive issues like diarrhea and cramping. In this instance, drink a lot of water. In the event of CO₂ release in a closed setting, which occurs when Pineapple Passion Dehydrated Yeast interacts with an Inhalation: aqueous solution, remove the individual to fresh air right away and call the local emergency services Allergens* Pineapple Passion Dehydrated Yeast does not contain added allergens. *EU Regulation 1169/2011 (Food Information Regulations) (Annex II) Symptoms and effects Effects both immediate and delayed are further indicated in section 11.

There is a low risk of fire and explosion, under typical circumstances for handling, storing, and using the product. Pineapple Passion Dehydrated Yeast can produce CO2 at extremely high temperatures.

involved in a fire.

gloves, and goggles etc.

Safety measures, protective gear, and emergency procedures

6. ACCIDENTAL RELEASE CONTROLS

Specific risks associated with the substance

Wash with water using gloves, boots, and eye protection. If there is a CO₂ release and you're in a closed space, use ventilation or breathing apparatus. **Environmental precautions**

Pineapple Passion Dehydrated Yeast is not considered to be environmentally hazardous,

In the event of a small or large spill or leak, Pineapple Passion Dehydrated Yeast is solid and shouldn't be handled as hazardous waste. It should be removed using a vacuum cleaner or

Rehydrated materials should be sent for sewage treatment after being heavily diluted with water. Pineapple Passion Dehydrated Yeast decomposes naturally.

another collection technique.

Pineapple Passion Dehydrated Yeast is available in 500g vacuum-packed silver foil packs.

This material complies with relevant food-contact legislation, including, EU Regulation 1935/2004 (materials intended for contact with food), EU Regulation 1245/2020 (plastic materials intended for contact with food)), EU Regulation 2023/2006 (GMP for materials

Storage Conditions: Store at cool to ambient temperatures (ideally 5°C to 15°C), dry, and well-ventilated environment.

Note: When added to water or a water solution, Pineapple Passion Dehydrated Yeast releases CO₂, especially on substrates high in sugars or starch. Ensure adequate ventilation to keep levels below advised exposure limits.

Precautions

Please note expiry date on packs prior to opening.

Storage and Handling

Use air-tight containers. Avoid the container leaking. Control spills and residues by safely destroying them (section 6).

Avoid eating, drinking or smoking while performing the procedure, and wash your hands

8. EXPOSURE CONTROLS **Conditions**

is occurring is necessary.

To reduce toxicological risks:

thoroughly with cleaning supplies after.

handled roughly as it may rise up dust.

Hazardous thermal (de)composition products: CO₂

protection should adhere to the applicable EN standard.

levels below advised exposure limits. If the room isn't ventilated after rehydrating, open the door about two minutes beforehand, and wear the oxygen detector.

Controlling the CO₂ levels should be possible with just adequate general ventilation. There is no need for specialized respiratory protection unless access to tanks where fermentation

Staff members must wear dust protective masks if Pineapple Passion Dehydrated Yeast is

Before using this product, a thorough risk assessment should be done to determine the best personal protective equipment for the local environment. Equipment for personal

Packaging Materials

intended for contact with food), and FDA CFR 21 (174-179) (USA).

but it should be disposed of properly, given its high organic content.

Techniques and supplies for containment and cleanup

Shelf life: 3 years from date of production, if vacuum seal is not broken, and if stored as outlined above. Handling: Once opened, re-seal to keep out air and water. For best results, store re-sealed packs in a refrigerator (0°C to 10°C) and use promptly.

To prevent fires and explosions: Pineapple Passion Dehydrated Yeast has a low fire and explosion risk, avoid dusting workplaces while handling and storing it. For safe manipulation:

When added to water or a water solution, Pineapple Passion Dehydrated Yeast releases CO₂, especially on substrates high in sugars or starch; ensure adequate ventilation to keep

Explosive properties: Yeast itself is not explosive 10. STABILITY/REACTIVITY **Conditions to avoid** Lack of stirring following rehydration. Dust is produced by vigorously shaking Pineapple Passion Dehydrated Yeast. High-temperature storage. **Chemical stability** Stable when stored according to recommendations. Chemical stability of this material is guaranteed by the storage and handling conditions. 11. TOXICOLOGICAL INFORMATION

handling, the risk is low.

Possible allergic sensitization.

Pineapple Passion Dehydrated Yeast does not contain genetically modified organisms or

Even at high doses, there is no acute toxicity.

For typical industrial handling, the risk is low.

May irritate the respiratory tract. For typical industrial

May irritate skin. For typical industrial handling, the risk is

Large doses may irritate the digestive tract when consumed.
